Recombinant Mouse FLT3LG (C-6His)

# Catalog No.: RP0090

Basic Information

Information

|	
Source	*Human Cells*
Description	Recombinant Mouse Fms-like Tyrosine Kinase 3 Ligand is produced by our Mammalian expression system and the target gene encoding Gly27-Arg188 is expressed with a 6His tag at the C-terminus.
Accession	P49772
Known As	Fms-related tyrosine kinase 3 ligand (Flt3L); SL cytokine; Flt3 ligand;
Predicted Mol Mass	19.4 KDa
Apparent Mol Mass	22-30 KDa, reducing conditions

Properties

Formulation	Lyophilized from a 0.2 μm filtered solution of PBS, pH 7.4.
Storage	Lyophilized protein should be stored at ≤ -20°C, stable for one year after receipt. Reconstituted protein solution can be stored at 2-8°C for 2-7 days. Aliquots of reconstituted samples are stable at ≤ -20°C for 3 months.
Endotoxin	< 1 EU/μg as determined by LAL test.
Reconstitution	Always centrifuge tubes before opening.Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100μg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
Shipping	The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature listed below.

Experimental Data

Purity-SDS-PAGE

Bioactivity-BLI

Greater than 95% as determined by reducing SDS-PAGE. (QC verified)

Loaded Recombinant Human FLT3 (C-Fc) on Pro-A Biosensor, can bind Recombinant Mouse FLT3LG (C-6His) with an affinity constant of 0.447 nM as determined in BLI assay. (Regularly tested)

Background

Fms-related tyrosine kinase 3 ligand(Flt3L) is a single-pass type I membrane protein and consists of 232 amino acids. Flt3L is a hematopoietic four helical bundle cytokine, structurally homologous to stem cell factor and colony stimulating factor. Flt3L synergizes well with a number of other colony stimulating factors and interleukins. Flt3L stimulates the proliferation and differentiation of various blood cell progentiors by activating FLT3.
